

## Contents

## EXECUTIVE SUMMARY

- Organization of This Report
- Concepts and Definitions
- Extrapolation from Animals to Humans
- Quality and Quantity of Data
- Biologic Markers Associated with Reproductive and Neurodevelopmental Toxicology
- Biologic Markers Associated with Male Reproduction
- Biologic Markers Associated with Female Reproduction
- Biologic Markers Associated with Pregnancy
- Biologic Markers Associated with Neurodevelopment
- General Recommendations and Conclusions

## REPORT OF THE OVERSIGHT COMMITTEE

- Concepts and Definitions
- Principles of Selection of Markers
- Validation of Biologic Markers
- Ecologic Markers
- Use of Biologic Markers in Risk Assessment
- Extrapolation from Animals to Humans
- Quality and Quantity of Data
- Implementation of Biologic Markers in Population Studies
- Long-Term Tissue and Cell Storage for Retrospective Analysis
- Use of Biologic Markers in Reproductive and Developmental Toxicology
- Summary

## BIOLOGIC MARKERS IN MALE REPRODUCTIVE AND GAMETIC GENETIC TOXICOLOGY

## INTRODUCTION

- Biologic Markers of Male Physiologic Damage
- Biologic Markers of Genetic Damage and Heritable Mutations in Human Germ Cells
- Importance of Animal Studies in Marker Development
- Organization of Male Reproduction Section

## CLINICAL EVALUATIONS OF MALE INFERTILITY

- Medical History
- Physical Examinations
- Semen Characteristics

## BIOLOGIC MARKERS OF TESTICULAR FUNCTION

- Physical and Chemical Markers of Testicular Function
- Leydig Cells
- Seminiferous Tubules

## BIOLOGIC MARKERS OF EPIDIDYMAL STRUCTURE AND FUNCTION

- Markers of Epididymal Tissue
- Changes in Maturing Spermatozoa
- Epididymal Luminal Fluid
- Epididymal Epithelial Function
- Epididymally Mediated Toxic Drug Effects

## BIOLOGIC MARKERS OF ACCESSORY SEX ORGAN STRUCTURE AND FUNCTION

- Physical Markers
- Structural Markers
- Functional Markers

## BIOLOGIC MARKERS OF HUMAN MALE REPRODUCTIVE HEALTH AND PHYSIOLOGICAL DAMAGE

- Needs for Biologic Markers of Human Male Reproductive Health
- Epidemiologic Studies of Human Sperm Production and Fertility

Human Spermatogenesis and Development of Semen-Based Markers  
of Male Reproductive Health  
Physical Characteristics of the Human Ejaculate  
Presence of Nonsperm Cells in Semen  
Sperm Number  
Sperm Structure  
Sperm Motility  
Sperm Viability  
Sperm Function  
Other Sperm Measurements  
Chemical Composition of Seminal Fluid  
Promising Research Concepts  
Semen Markers of Sertoli Cell and Leydig Cell Function  
Recombinant-DNA Methods for Study of Human Spermatogenesis  
and Semen

#### ASSESSING TRANSMITTED MUTATIONS IN MICE

Assessing Markers in Laboratory Animals  
Markers of Exposure  
Tests in Mice To Determine Transmitted Genetic Effects  
Needed Research on Genetic Damage in Laboratory Animals

#### MARKERS FOR MEASURING GERMINAL GENETIC TOXICITY

##### AND HERITABLE MUTATIONS IN PEOPLE

Current Methods for Measuring Human Heritable Mutations  
Results of Epidemiologic Studies of  
Human Heritable Mutations in Exposed Populations  
Human Somatic Mutation Methods  
New Molecular Approaches for Detecting Heritable Human Mutations  
Testicular Markers of Human Germinal Cytogenetic Damage  
Semen Markers of Human Germinal Mutations and Genetic Toxicity  
Summary

#### CONCLUSIONS AND RECOMMENDATIONS

Identification of Markers of Abnormal Physiologic Function  
Semen Markers of Abnormal Physiologic Function  
Need for Improved Measures of Fertility Status and Exposure  
Identification of Markers of Germinal Genetic Toxicity  
and Heritable Mutations  
Criteria for Development and Validation of Markers  
of Male Reproduction  
Strategy for Testing Effect of Toxic Chemicals  
on Markers of Male Reproduction

#### BIOLOGIC MARKERS IN FEMALE REPRODUCTIVE TOXICOLOGY

##### INTRODUCTION

Oogenesis  
Development of the Female Reproductive Tract  
Maturation  
Cyclic Ovarian Function  
Fertilization  
Reproductive Senescence

##### BIOLOGIC MARKERS OF GENETIC DAMAGE IN FEMALES

Markers of Exposure  
Markers of Oocyte Toxicity  
Markers of Genotoxic Damage or Repair  
Markers of Mutational Events

##### BIOLOGIC MARKERS OF REPRODUCTIVE DEVELOPMENT AND AGING

Markers of Maturation  
Menstruation  
Loss of Fertility and Fecundity  
Precocious Menopause  
Ovarian Oocyte Depletion  
Hormones  
Nervous System

## Observations on the Use of These Markers

## BIOLOGIC MARKERS OF NONCONCEPTIVE MENSTRUAL CYCLES

- Specific Markers
- Biologic Rationale

## DEVELOPING ASSAYS OF BIOLOGIC MARKERS

FOR EPIDEMIOLOGIC STUDIES: EXPERIENCE WITH  
A MARKER OF PREGNANCY AND EARLY LOSS

- Assays of hCG
- Field Studies of Early Fetal Loss:
- Testing the Utility of the hCG Assay
- Future Assay Developments

## CONCLUSIONS AND RECOMMENDATIONS

- Special Research Opportunities
- Specific Research Recommendations
- National Data Base
- Experimental Studies

## BIOLOGIC MARKERS OF TOXICITY DURING PREGNANCY

## INTRODUCTION

- The Events of Pregnancy
- Maternal Physiology
- Embryonic/Fetal Changes
- Placental Involvement

## MOLECULAR BIOLOGY: DEVELOPING DNA MARKERS

## OF GENOTOXIC EFFECTS

- Detecting Heritable Genetic Damage
- Markers of Exposure

## REPRODUCTIVE IMMUNOLOGY:

## BIOLOGIC MARKERS OF COMPROMISED PREGNANCIES

- Maternal Immunologic Recognition
- and Reaction During Normal Pregnancy
- Tests to Determine Markers of Mechanisms
- of Recurrent Pregnancy Loss
- Promising Markers of Maternal-Fetal Interaction
- Promising Techniques That Might Yield Biologic Markers

## CELL BIOLOGY: IDENTIFYING BIOLOGIC MARKERS EXPRESSED

## DURING EARLY PREGNANCY

- Implantation
- Assessing Endometrial Signals
- Trophoblast Biologic Markers
- Extrapolation to Human Trophoblasts

## PHYSIOLOGIC ASSESSMENT OF FETAL COMPROMISE

- Ultrasonography
- Amniocentesis
- Chorionic Villus Sampling
- Fetoscopy
- Fetal Blood and Tissue Sampling
- Measuring Fetal Body and Breathing Movements
- Electronic Fetal Heart-Rate Monitoring
- Biophysical Profile
- Magnetic Resonance Imaging

## BIOLOGIC MARKERS OF EXPOSURE DURING PREGNANCY:

## PHARMACOKINETIC ASSESSMENTS

- Assessments for Pharmacokinetic Analyses
- Current and Promising Markers

## CONCLUSIONS AND RECOMMENDATIONS

- Research Strategies
- Accomplishing the Research Goal

Bringing the Assay Out of the Laboratory and Into  
the Public Health Domain  
Assessments of the Status of Specific Markers Related  
to Pregnancy  
Markers of Exposure

#### BIOLOGIC MARKERS IN NEURODEVELOPMENTAL TOXICOLOGY

##### INTRODUCTION

Biologic Markers of Exposure:  
Pharmacokinetic Considerations  
Biologic Markers of Effect:  
Pharmacokinetic Considerations

#### DEVELOPMENTAL NEUROBIOLOGY OF THE CENTRAL NERVOUS SYSTEM

Basic Morphogenesis  
Basic Cytogenesis  
Neurochemistry of Neuronal Communication

#### MORPHOLOGIC, NEUROCHEMICAL, AND BEHAVIORAL RESPONSES TO TOXIC AGENTS

Effects of Time of Exposure and Dose: Irradiation as  
A Paradigm  
Microneuronal Radiation  
Application to Other Toxic Substances  
Relationship Between Minor Physical Anomalies  
and Behavioral Effects  
Neurochemical Effects  
Behavioral Effects

#### METHODOLOGIC ISSUES OF EXTRAPOLATION FROM ANIMAL STUDIES TO HUMAN TOXICANT EXPOSURE

Investigation of Underlying Mechanisms  
Study of Comparable Functional End  
Direct Comparisons Between Animals and Humans  
Data Interpretation

#### LEAD AS A PARADIGM FOR THE STUDY OF NEURODEVELOPMENTAL TOXICOLOGY

Markers of Exposure to Lead  
Markers of Effect  
Markers of Susceptibility  
Methodologic Considerations in the Establishment  
and Evaluation of Markers of Development  
Adverse Health Effects

#### CONCLUSIONS AND RECOMMENDATIONS

Models of Neurodevelopment  
Neuroendocrine and Neuroimmunologic Markers  
Neurochemical Markers

#### APPENDIX: ASSESSING THE VALIDITY OF BIOLOGIC MARKERS: ALPHA-FETOPROTEIN

Assessing the Validity of Biologic Markers  
Validity of Maternal Serum AFP Measurement as  
a Biologic Marker of NTDs

#### REFERENCES

#### BIOGRAPHIES

#### INDEX
